Subject: Narkomed 6100 Advanced Platform with Flat Panel Display

Effective September 20,1999, Narkomed 6000 anesthesia machines will only be available as the advanced platform Narkomed 6100. This platform is designed to better accommodate future upgrades with a 15-inch flat panel monitoring display that offers a larger viewing area and greater resolution. All machine orders will be entered as the Narkomed 6100. The base list price for the Narkomed 6100 is $63,600. An aftermarket update kit is being developed that will allow installed base Narkomed 6000 customers to upgrade to the advanced platform. A Product Bulletin will follow with information pertaining to this Kit. If there are any questions associated with this Product Bulletin, please contact John Gotzon, ext. 2619.
